SENIOR TECHNICAL TEAM LEADER

IT LEADERSHIP | PROJECT MANAGEMENT | DIGITAL TRANSFORMATION | UNIFIED COMMUNICATION SYSTEMS | IT INFRASTRUCTURE OPERATIONS | IT SERVICE MANAGEMENT | IT INTEGRATION

Accomplished ICT leader with 18+ years of experience in enterprise IT infrastructure, communication systems, and digital transformation, providing professional and client-focused technical support to 2000+ users. Proven track record of leading large-scale IT initiatives, optimizing communication networks, and driving strategic technology advancements. Adept at managing cross-functional teams, improving operational efficiencies, and installing cutting-edge IT solutions.

EDUCATION

DBA Candidate (Executive Doctorate in Business Administration) – Faculty of Commerce, Menofia University (2023 – Present)

Master of Business Administration (MBA), Project Management – Arab Academy for Science, Technology & Maritime Transport (2017)

CISCO Academy (Arab Academy for Science & Technology) Alexandria, Ministry of Communication & Information Technology (MCIT) scholarship program (2006)

Bachelor of Science in Electrical Engineering, Communication & Electronics – Alexandria University (2005)

EXPERTISE

- Unified communications solutions
- IT Leadership & Management Strategy
- Strategic Planning & Consulting
- Communication Systems
- Auditing & Supervisory
- Project Planning & Implementation
- Change Management & Consulting
- Coaching & Employee Development
- Troubleshooting & Innovative Solutions
- IT Service Delivery
- Business Intelligence & Continuity
- Stakeholder & Vendor Relations
- Proactive Problem Solving
- IT systems Administration

TECHNICAL SKILLS

- Avaya Aura Technologies and Products (Communication manager, Session manager, System manager, Breeze, Media Server, *Equinox, SBCE, IX Messaging, Web gateway ,Device services* and IP office).
- Cisco Call Manager, Cisco L2/L3 Switches & Routers and Cisco Servers - Unified Computing System (UCS).

- Supervise and coordinate the daily activities of the service team and providing 1st –level server support.
- Facilitates a full ICT systems migration by conducting a current technologies survey, preparing the technical specifications and estimating cost and begin a new tenders operations to upgrade the current traditional legacy systems with a new fully Digital IT systems.
- Supporting basic cloud service administration and user productivity tools using Microsoft Azure and 365 Apps.
- Create backup polices, disaster recovery procedures and audits.
- Takes ownership of critical incidents, coordinating with resolution parties, and establishing effective communication between stakeholders for post-incident reviews.
- Identifies necessary resources needed and assigned individual responsibilities to ensure efficiencies of the ICT operations.
- Creates and executes work plans to meet changing needs and requirements, and keep monitoring progress and tracking KPIs.
- Motivates and develops unit members to raise performance levels through assessment, training, and mentoring.

WALID EL SAYED ZAKI MAHMOUD

Alexandria, Egypt | 002 01008926754 | eng.waleedzaky@gmail.com

Principal IT Communication Engineer - ICT Infrastructure & Operations Department | July 2013 – June 2016

Key role providing recommendations on ICT solutions, complex trouble resolutions, test plans, test results, and implementation plans. Provided ongoing advice to engineers in resolving operational problems, while tracking lessons learned and sharing with team.

- Designed and implemented many projects that facilitates and effectively contribute in ICT operation solutions such as programming an Auto Attendant to automatically reply to incoming calls before routing to operators; built a call center system to receive and queue calls; monitoring/reporting tools resulted in fewer dropped calls and raised performance levels.
- Researched automation tools and chose Python programming language and wrote a script for all switch IP addresses to run commands and extract output from all network data switches utilizing modern automation technologies to increase efficiency.
- Video call host licenses using the latest video calls applications (MS Teams, Zoom, WebEx) implemented in a range of locations, including small offices, medium halls or large theaters.
- Help the Engineering department in maintaining the whole DVR/NVR CCTV Surveillance cameras system.
- Implement and maintain remote site VPN data network connections with branch offices.
- Provide ongoing support in the detection, diagnosis, and resolution of incidents or events.
- Target, track, and test new and deployed software baselines, patches, and upgrades.

IT Communication Engineer, ICT Infrastructure & Operations Department | July 2009 – June 2013

Successfully provided ongoing consultations and support to internal customers on voice communications issues and services, including adds, moves, and changes to existing communications.

- Provided essential troubleshooting for ICT Systems operational problems, as well as on-site and remote support.
- Facilitated, maintained and installed H/W and S/W updates.
- Analyzed ICT systems faults, ran troubleshooting and diagnostic tests on related applications and hardware to isolate and resolve problems.
- Worked closely with vendors on ICT-related trouble calls.
- Maintained and supported external sites and offices.

Junior IT Communication Engineer, ICT Infrastructure & Operations Department | May2007 – June 2009

Established, maintained and led troubleshooting of telephony systems, including network resources and supporting applications.

- Managed workflow through a call center system and dispatched process, while providing advice to Users in solving software and hardware technology problems.
- Performed preventive maintenance on telephony software applications and hardware, as well as repairs to telephony system and environmental problems.
- Resolved issues and ongoing operational problems in the IT commutation systems.
